Subject: Microsoft Settlement

I am a registered Republican, voted for Bush and am a strong supported of most of what he has been doing.

One of the things that I cannot support is his administration's stand on the Microsoft settlement that has been offered.

Having spent most of my working, adult life in high technology companies in Silicon Valley, I am well aware of what has happened in this arena and believe Microsoft has grown not only because of their innovative products but because of their predatory and illegal approach to competition.

They should be hammered!
